

ADVANTAGES OF PLAYING WITH AN X - ULTRA?

- New 15" Pro-Taper for improved shot accuracy and cue ball control.
- Our advanced Ultra-Violet lacquer system is used for a long lasting and durable finish.
- Tiger offers the X-Ultra shaft in more joint options than any other name shaft brand on the market!
- It all starts with highest grade Hard Rock Canadian Maple, add to that Tiger's own curing process which improves feel of the wood, while reducing the risk of warpage.
- With our solid-core construction, no feel is sacrificed.
- You'll have none of those pesky dead ping noises while you shoot either!
- Tiger designed custom phenolic joint inserts* are used for that solid "wood to wood" feel.
- All shaft parts are threaded for added strength and durability.
- Tiger's patented ferrule design reduces deflection, adds strength and imparts more spin vs. the traditional wood tenon & sleeved ferrule.

THE ULTIMATE HIGH PERFORMANCE CUE SHAFT IN BILLIARDS!

TECHNOLOGY & CONSTRUCTION

Patented
Technology

CONSISTENCY

(Lamination Technology)

Tiger X-Ultra high performance shaft (UP*) Cross Grain Lamination Technology © is unmatched in providing shaft flex consistency without sacrificing a solid hit & great feel. Accuracy is increased tremendously, giving you the confidence that the cue ball is going where you want it to!!!

* UP - Ultimate Precision cutting & laminating method has been added on the new X Ultra. Improved stats on lamination consistency & strength vs. original X shafts 37%

POWER

(Design Technology)

Made of Saber-T®, threaded in to the shaft all Tiger® ferrules are stronger than the competition!!! Tigers patented center design adds a more solid hit than any other shaft on the market!!! Tiger GUARANTEES their ferrules for life* against cracking!!!

FEEL

(Sniper Tip Technology)

All objects at the time of impact, transfer equal power and vibration around it's center. X Ultra shafts' solid center at the time of impact, allows the fullest of impact travel response & eliminates unnecessary vibration!!! Add the Sniper Laminated Cue Tip © to this exclusive Tiger Cross Grain Lamination Technology © for unsurpassed feel and control in every stroke!!!

CONTROL

(Ferrule Technology)

Tiger ferrules minimize tip - end - weight - induced deflection!!! Far more accurate than conventional ferrules, Tiger ferrules give unmatched control for maximum spin and draw!!!

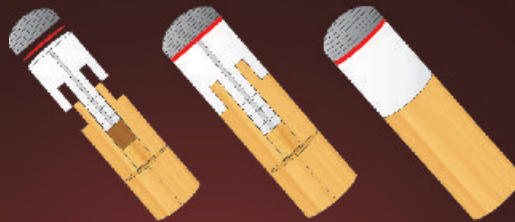

Joints available: 5/16 (14 or 18) flat or piloted, 3/8 (10), Radial & UNI-LOC® q-release
Joint collar: Black phenolic (standard) or w/silver ring
Ferrule length: 5/8"
Cue tip: Sniper laminated cue tip/w Red fiber backing
Tip diameter: 12.75 mm
Taper: Pro 15"
Shaft length: 29" (standard) or 30"

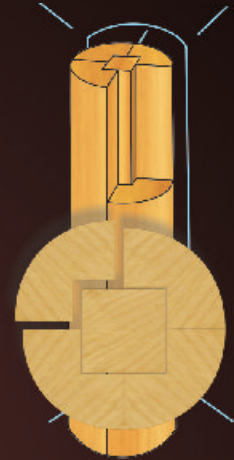

GRAPHS AND STATS

***Improvements:**

From 3% & up to 37% were seen in each category when comparing the Tiger X ULTRA[®] high performance shafts to other shafts. All tests were performed at Tiger Products from 1-2-08 until 6/28/08 using many brand name products. In each category 25 shots were made on average. Sniper tips were used for all product testing. The amount of deflection (squirt), depending on the shot, can be adjusted by using different speeds. (From 1 to 5, five being fast, most shots speed were between 2 and 3).

TIGER X ULTRA SHAFT BENEFITS:

When using inside English, X-Ultra high performance shafts' low deflection and TRU-AIM™ system helps to eliminate the guess work by making the more difficult shots easy. You get more grip & radial consistency to position the cue ball with less effort. X-Ultra is the only shaft that gives you ultimate control in every shot category. Control the game! Show off your maximum playing capability! **Build confidence and start winning!**
