X-Laminated Shaft

OB-1

join the revolution

Patent Pending Technology

Verzahnte Segmente sind laminiert und spannungsfrei verleimt. Hierdurch wird eine unvergleichliche Stärke, Beständigkeit sowie Schutz vor Verzug des Oberteils erreicht.

Der schwingungsgedämpfte Kern in Verbindung mit dem laminierten Holz-Ferrule sorgt für ein nie dagewesenes, einmaliges Stoßgefühl.

Diese Konstruktion ist Garant für sehr geringe Abweichung des Spielballs beim Effetspiel.
